Where the representation loses phase: true-medium projection oracles
Correlated cosine · new 16 · rank 255
Local Gaussians · used DEV 8 · rank 128
Original broad source
Unseen 2 m narrow source
Equal error
True-medium speed-PCA Euclidean projection raw
True-medium q-PCA Euclidean projection raw
10^{-1}
10^{-2}
10^{-3}
Oracle: both axes READ the true test medium; neither is a deployable low-band prediction.
Same one-way PDE, but different families/ranks/splits. Euclidean projections are not best-response capacity bounds.
